

Job Title: Incoming Quality Inspector – PCBA (IQC)

Location: Bangalore

Department: QA – IQC

Role Summary

We are looking for a skilled **IQC Inspector (PCBA)** to support incoming quality inspection activities. The candidate will be responsible for inspecting PCBAs as per IPC standards, BOM, drawings, and revisions, with strong knowledge of soldering workmanship, component identification, basic electrical checks, ESD handling, and quality documentation.

Key Responsibilities

- Perform incoming PCBA inspection as per IPC-A-610 standards
- Verify components with BOM, drawings, and revision control
- Inspect SMD/THT solder joints and identify workmanship defects
- Check component polarity, orientation, value, and placement
- Verify connector/Bergstick alignment, height, and solderability
- Inspect PCB quality: pad condition, cut traces, scratches, burrs, and cleanliness
- Perform basic continuity/short checks using a multimeter where required
- Ensure ESD handling and safe board handling practices
- Maintain IQC records, segregate NG materials, and raise NCR
- Coordinate with Stores, Production, R&D for quality issues and ECN/deviation checks
- Verify labeling, identification tags, and lot traceability
- Support root cause analysis with defect evidence (photos/reports)

Required Skills

- 1–2 years of experience in PCBA inspection/quality
 - Knowledge of IPC-A-610 solder joint acceptance criteria
 - Strong understanding of SMD and THT soldering process
 - Practical knowledge of SMD and THT soldering; ability to perform basic soldering and rework for validation during inspection
 - Ability to identify solder defects (dry solder, cold solder, bridges, lifted pads)
 - Ability to read PCB drawings, schematics, and BOM
 - Knowledge of component identification (value, package, polarity)
 - Basic knowledge of multimeter usage for continuity testing
 - Understanding of ESD and safe handling practices
 - Knowledge of inspection tools: magnifier/microscope, vernier caliper, height gauge
 - Basic computer knowledge (Google sheets, Google doc, Word)
 - Good documentation and reporting skills
 - Good communication skills to interact with internal teams
-

Qualification

- Diploma in ECE / EEE / Electronics
- 1–2 years of experience in PCBA inspection / quality control
