PROFESSIONAL SUMMARY

QA Associate with 1+ year of hands-on experience in incoming inspection, SAP QM, NCR handling, and root cause analysis across defence and automotive manufacturing environments in compliance with AS9100D and ISO 9001:2015 standards.

TECHNICAL SKILLS

- **Inspection Tools:** GD&T, Vernier Calliper, Height Gauge, Digital Multimeter, Microscope
- **Software & Reporting Tools:** SAP QM, Power BI, MS Excel (Advanced)
- **Quality Systems:** NCR Handling, 5-Why Analysis, Incoming Quality Control (IQC), Supplier Quality Coordination
- **Standards & Compliance:** IPC-A-610, AS9100D, ISO 9001:2015

EXPERIENCE

Quality Assurance Associate – Incoming Quality

Avirata Defence Systems Ltd, Bengaluru | Dec 2025 – Present

- Executed incoming inspection of PCBA and mechanical components daily using GD&T, vernier calliper, and multimeter in compliance with **AS9100D standards**.
- Identified and quarantined non-conforming incoming materials through defect containment, preventing defect leakage.
- Executed inspection lots and usage decisions in **SAP QM**, ensuring end-to-end material traceability and accurate documentation.
- Coordinated with engineering and procurement teams to resolve BOM discrepancies and documentation issues, ensuring on-time material release to production.

Manufacturing Quality Engineer - Intern

Bosch Automotive Electronics India, Bengaluru | July 2025 – Oct 2025

- Built a data-driven Power BI dashboard tracking ABS verification station failures across 2 production lines, processing 1,000+ rows of raw data using Advanced Excel to identify top failure modes.
- Created and deployed a **WIP monitoring SOP** adopted by 8+ operators, improving process standardisation and reducing tracking errors across the quality department.
- Performed functional test validations on 10+ non-conforming PCBA parts daily, recording test data to support root cause analysis and quality improvements.

PROJECTS

Power BI Dashboard for Production Failure Analysis

- Collected, cleaned, and analyzed production failure data using Excel functions and Power BI to identify key failure trends.
- Built a Power BI Dashboard to visualize defect trends, rejection rates & failure patterns for data-driven quality improvement.
- Collaborated with cross-functional teams to analyze time-to-failure trends and support process indicators reduction.

Wireless Operated Robotic Arm Vehicle for Industrial Automation

- Designed and developed a wireless robotic arm vehicle using an 8051 microcontroller, RF communication, and motor driver modules, enabling efficient pick-and-place operations.
- Implemented RF-based motion control (lift, grip, release) for a robotic arm, achieving stable and responsive object handling.

EDUCATION

Sri Siddhartha Institute of Technology

2021 – 2025

B.E. in Electronics and Telecommunication Engineering

Narayana PU College

2019 – 2021

Science - PCMC

EXTRACURRICULAR

- Completed MSME Vendor Development Programme at BEL - gained applied exposure to SMT process quality, IPC-A-610, wire harness inspection, and PCB visual quality criteria.
- Awarded Certificate of Excellence & Won 1st place at ROBOVEDA '23 in Cozmo Clench robotics competition at SNIST College.
- Completed 2 year NCC training; developed discipline, structured problem-solving, and team leadership.
