PROFESSIONAL SUMMARY

QA Associate with hands-on experience in incoming inspection, SAP QM, NCR handling, and root cause analysis across defence and automotive manufacturing environments in compliance with AS9100D and ISO 9001 standards.

TECHNICAL SKILLS

- **Software & Reporting Tools:** SAP QM, Power BI, Advanced MS Excel, Dashboard Reporting
- **Inspection Tools:** GD&T, Vernier Calliper, Height Gauge, Digital Multimeter, Microscope
- **Standards & Compliance:** AS9100D, ISO 9001:2015, IPC-A-610
- **Quality Systems:** NCR Handling, 5-Why Analysis, SCAR, Incoming Quality Control (IQC), Supplier Quality Coordination, FMEA

EXPERIENCE

Quality Assurance Associate – Incoming Quality

Avirata Defence Systems Ltd, Bengaluru | Dec 2025 – Present

- Executed incoming inspection of PCBA and mechanical components daily using GD&T, vernier calliper, and multimeter in compliance with **AS9100D standards**.
- Identified and quarantined non-conforming incoming materials through defect containment, preventing defect leakage.
- Performed inspection lots and usage decisions in **SAP QM**, ensuring end-to-end material traceability and accurate documentation.
- Coordinated with engineering and procurement teams to resolve BOM discrepancies and documentation issues, ensuring on-time material release to production.

Manufacturing Quality Engineer - Intern

Bosch Automotive Electronics India, Bengaluru | July 2025 – Oct 2025

- Built a data-driven Power BI dashboard tracking ABS verification station failures across 2 production lines, processing 1,000+ rows of raw data using Advanced Excel to identify top failure modes.
- Created and deployed a **WIP monitoring SOP** adopted by 8+ operators, improving process standardisation and reducing tracking errors across the quality department.
- Performed functional test validations on 10+ non-conforming PCBA parts daily, documenting failure modes to support 5-Why root cause analysis.

PROJECTS

Power BI Dashboard for Production Failure Analysis

- Collected, cleaned, and analyzed production failure data using Advanced Excel and Power BI to identify key failure trends.
- Built an end-to-end Power BI dashboard visualising defect frequency, rejection rates, and failure mode distribution, enabling data-driven corrective action for the manufacturing team.
- Identified the top 3 recurring failure modes at the ABS production stations, supporting process improvement initiatives to reduce the rejection rates.

Wireless Operated Robotic Arm Vehicle for Industrial Automation

- Designed and developed a wireless robotic arm vehicle using an 8051 microcontroller, RF communication, and motor driver modules, enabling efficient pick-and-place operations.
- Implemented RF-based motion control (lift, grip, release) for a robotic arm, achieving stable and responsive object handling.

EDUCATION

Sri Siddhartha Institute of Technology

2021 – 2025

B.E. in Electronics and Telecommunication Engineering

Narayana PU College

2019 – 2021

Science - PCMC

EXTRACURRICULAR

- Completed MSME Vendor Development Training Program 2026 at BEL - gained applied exposure to SMT process quality, IPC-A-610, wire harness inspection, and PCB visual quality criteria.
- Awarded Certificate of Excellence & Won 1st place at ROBOVEDA '23 in Cozmo Clench robotics competition at SNIST College.
- Completed 2 year NCC training; developed discipline, structured problem-solving, and team leadership.
