EDUCATION

Sri Siddhartha Institute of Technology, Tumkur <i>B.E. in Electronics and Telecommunication Engineering</i>	2021 – 2025
Narayana PU College, Bengaluru <i>Science - PCMC</i>	2019 – 2021

TECHNICAL SKILLS

- Languages: Python, SQL
- Tools: Power BI, SAP QM, MS Excel (Advanced), MS Office
- Quality System: NCR Handling, SCAR, Lean Manufacturing, Root Cause Analysis
- Analytical Abilities: Data Analysis & Reporting, Data Visualization, Supplier Quality Coordination

EXPERIENCE

Quality Assurance Inspector

Avirata Defence Systems Ltd, Bengaluru | Dec 2025 – Present

- Performed incoming inspection of **mechanical** and **PCB components** using vernier calliper, height gauge, and multimeter in compliance with **ISO 9001 & AS9100 standards**.
- Identified and contained non-conforming materials, reducing defect leakage into production and improving product quality.
- Executed inspection lots and usage decisions in **SAP QM**, ensuring traceability, accurate documentation & inventory control.
- Collaborated with cross-functional teams to resolve **BOM discrepancies** and **documentation issues**, reducing delays in production readiness.

Manufacturing Quality Engineer - Intern

Bosch Automotive Electronics India, Bengaluru | July 2025 – Oct 2025

- Developed a data-driven **Power BI Dashboard** of ABS verification station failures by collecting and cleaning production line data using advanced Excel functions.
- Collaborated with cross-functional teams to monitor defect trends & implement corrective actions for process improvements.
- Created and implemented an **SOP for the WIP monitoring tool**, improving process standardization and tracking efficiency.
- Performed functional test validations on 10+ non-conforming PCBA parts daily, recording test data to support root cause analysis and quality improvements.

PROJECTS

Power BI Dashboard for Production Failure Analysis

- Collected, cleaned, and analyzed production failure data using Excel functions and Power BI to identify key failure trends.
- Built a Power BI Dashboard to visualize defect trends, rejection rates & failure patterns for data-driven quality improvement.
- Collaborated with manufacturing teams to analyze time-to-failure trends and support process indicators reduction.

Operated Robotic Arm Vehicle for Industrial Automation

- Designed and developed a wireless robotic arm vehicle using an 8051 microcontroller, RF communication, and motor driver modules, enabling efficient pick-and-place operations.
- Implemented RF-based motion control (lift, grip, release) for a robotic arm, achieving stable and responsive object handling.

CERTIFICATIONS

- IBM Cognitive Class - SQL and Relational Databases 101
- Indian Institute of Remote Sensing (ISRO) - AI/ML Geodata Analysis

EXTRACURRICULAR

- Completed **MSME Vendor Development Training** at Bharat Electronics Limited (**BEL**), gained exposure to SMT processes, wire harness standards, PCB inspection, and soldering quality practices.
- Awarded **Certificate of Excellence** & Won 1st place at ROBOVEDA '23 in Cozmo Clench robotics competition at SNIST College.
- Completed 2 years of NCC training; demonstrating discipline, leadership, and teamwork.
